

Product Specification Sheet

Key Features

- Compatible with all 2kg and 5kg CO₂ fire extinguishers
- Simple, quick installation for efficient mounting
- Zinc-plated finish provides excellent corrosion resistance and long-lasting durability
- Robust construction ensures secure and stable support
- Designed to withstand typical environmental conditions in commercial and industrial settings
- Lightweight yet strong for easy handling without compromising safety

Designed specifically to securely mount all 2kg and 5kg CO₂ fire extinguishers to walls or other fixed surfaces, our FireShield bracket ensures safe and accessible placement of your extinguisher. Constructed from durable materials, it provides reliable support tailored to the unique shape and weight distribution of CO₂ extinguishers, helping prevent accidental falls or damage. Important: This bracket is not compatible with water, foam, powder, or wet chemical fire extinguishers due to differences in size, shape, and mounting requirements. Use the appropriate bracket designed for those extinguisher types to ensure proper fit and safety.
